

Smoki

Cigarette Smoke Odor Remover Spray for Interiors

SMOKI is the innovative spray to remove smell of smoke from environments and surfaces. SMOKI does not cover the smell, but it irreversibly takes it all, purifying the environment in which it is delivered. It does not damage the materials and it has a long-lasting effect. SMOKI is easily applied, it acts quickly and does not require to air the room after use, leaving a fresh and pleasant scent of cleanliness. USE: deliver SMOKI upwards, in amounts proportional to the smell in the cockpit or in the room and let its particles purify the air for a few seconds. If you need to treat textiles or upholstery, position the aerosol can at 30 cm from the surface, and deliver it up to cover the affected area with a thin layer.
